

Liberty[®] OCEAN

Humanscale[®]

From Ocean to Office

Discarded fishing nets are widely regarded as the most harmful type of ocean plastic as they can “ghost fish” for years, damaging delicate ecosystems and the marine animals that inhabit them. To combat this problem and build upon our commitment to creating a Net Positive impact on the Earth, Humanscale has expanded its Ocean seating line with Liberty.

Like its predecessor, the Smart Ocean, Liberty Ocean helps clean up our oceans with each chair using almost 2 pounds of reclaimed fishing net material. Adhering to our core design philosophies, Liberty Ocean features the same Form-Sensing Mesh Technology and seamless functionality as all Humanscale task chairs. The chair instantly adjusts to each unique user to provide the perfect support in every position without knobs, locks, or levers.

Key Features

- Each chair incorporates almost 2 lbs of reclaimed fishing nets
- Self-adjusting recline automatically provides the right amount of support, regardless of sitter's size or weight
- Pivoting backrest provides instant support as the sitter changes positions
- Form-Sensing Mesh back creates body-fitting contours and self-adjusting lumbar support for a customized fit
- Contoured seat cushions closely follow the body's shape, while a waterfall edge offers long-term comfort, reducing pressure points and providing weight distribution
- Adjustable or fixed armrests connect to the backrest instead of the seat to stay with the body during recline
- 15-year, 24/7 warranty

Specifications

	IN / LBS	MM / KG
Seat Depth	16.5" - 18.75"	420 - 475 mm
Seat Height	16.6" - 20.9"	420-530 mm
Backrest Height	23"	570 mm
Chair Width (with arms)	26.5"	675 mm
Armrest Height	10" fixed, 6.25" - 9.75" adjustable	255 mm fixed, 165 - 250 mm adjustable
Distance Between Armrests	19"	485 mm
Height	39.25" - 43.625"	980 - 1105 mm
Chair Weight (armless)	30 lbs	13.6 kg
Chair Weight (with arms)	34 lbs	15.4 kg
