

HAWORTH

Compose

Gallery Panels

Compose® gallery panels are an economical alternative to traditional frames, while still providing an array of options like glass and accessories. Design or retrofit any application where a non-powered or non-structural panel is required—and invest where you choose. With their thinner profile, gallery panels bring a seamless aesthetic that complements and elevates the workspace.

Certifications

- GREENGUARD® Certified

Features

- Enhance space division, add privacy/enclosure, and increase work tool options
- Blends with Compose applications, like full-height Compose panels and Compose Beam
- Offers an alternative to return panels
- Dimensional logic aligns to Compose product line and Integrated Palette™
- Height range: 26-58"; width range: 18-120"
- Wide range of solid and wood-grain laminate finish options—the same laminates as Compose workspaces
- Wood-grain laminates available in horizontal or vertical grain direction
- Glass stack-on components include glass topper and frameless glass
- Optional wall-mounted components—fabric tackboards, whiteboards, and Belong® slat rails—enhance the space
- For workstation customization, add gallery attached worksurfaces, countertop, and top mounted storage box
- Trim post options include a seamless variable height trim post and the standard variable height trim post
