Upside

Height-Adjustable Benching

Upside® height-adjustable benching is a flexible workspace solution that delivers power and data without the confines of a panel. Its clean, in-line design supports a broad range of workstyles and ergonomic preferences, and as a scalable kit-of-parts, it demonstrates the same strong performance features of Upside's height-adjustable tables.

Features

- Available in one-sided, two-sided, or three-sided 120° configurations
- Features an adjustable frame system with separately specified power and data channels
- Provides a clean, simple approach to accessing, routing, and concealing power
- Standard and extended range electric height adjustment options
- Optional privacy in-fill panels and wire management accessories conceal cables and cords
- Compatible with a broad range of screens, gallery panels, suspended pedestals, and monitor arms
- Works with gallery panel accessories for enhanced functionality and aesthetics
- Built-in gyro-sensor collision detection technology
- Features the same column profile, foot aesthetic, and adjustment paddle design as Upside height-adjustable tables
- 250 lbs. lifting capacity on single-sided and two-sided bases, 330 lbs. on three sided bases

Certifications

- BIFMA Level 3 Certified
- Extended range bench meets BIFMA G1 - 2013 Ergonomics Guideline for Furniture
- GREENGUARD Certified
- ETL Listed
- GSA Compliant
- FSC Certified
