Collaborative Power Modules

Accessories

With a range of scalable options and configurations, collaborative and conference power modules offer functional choices for power, charging, and connectivity for training and meeting rooms, plus cafes, lobbies, and other social spaces throughout the work environment.

Features

- Flush-mount round module (shown top right) has 2 total ports for power only or power with optional data, dual USB-A, or USB-C configurations available in Silver, Midnight Black, and Parchment colors
- Wireless charging module has 1 power outlet (shown page 1), plus options for 1 or 2 USB-A ports and 1 or 2 Qi charging pads in a black or white finish
- Smooth bezel flip-top unit offers a range of configurations for power, USB-A, USB-C (18 or 60W), data, and a bay for audio/video cords in a single or dual sided, sleek pop-up design painted in Silver, Midnight Black, Matte White, or Matte Gray
- Flush-mount power module with sliding door installs in the worksurface to hide and reveal 4- and 6-port configurations that can include standard power, USB-A, data, and a bay for audio/video cords
- Collaborative power station (shown top left) has 3 power, 1 dual USB-A, and 1 USB-C ports to provide charging for social spaces, cafes, lobbies, touchdown spots, and other areas with limited power accessibility
- Bezel utility module with a round or square face mounts directly into the table and offers a dual USB-A charging port or 1 power outlet
- Quick Connect Two system allows power to be easily daisy-chained from table to table in a conference or collaborative setting and provides functionality for a variety of products, such as Planes and Jive C-leg or T-leg training tables
- A variety of mounting brackets is available for all power modules

Certifications

- ETL listed to UL standards
